PROFESSIONAL EXPERIENCE

Data Engineer I

Sep 2023 – present

BENlabs

- Enabled the data scientists to publish models by fixing their failed deployments in CI/CD (GitHub Actions, AWS CDK)
- Eliminated tech debts related to repository hosting by migrating internal tools from Bitbucket to GitHub, reconfiguring the tools with projen, and publishing the tools to AWS CodeArtifact
- Increased data product quality by coaching the data scientists on software engineering best practices and enforcing those practices during pair programming & code review

Data Engineer Intern

Sep 2022 – Apr 2023

BEN Group, Inc.

- Enabled the data science team and the analytics team to monitor AI batch jobs by building and deploying a monitoring system (Python, AWS SDK, AWS Step Functions)
- Enabled the data engineering team to control OpenSearch data access by building a CLI tool (AWS CDK, AWS OpenSearch Service, AWS Secrets Manager, pytest)
- Provided company-wide access to Twitch data by building three data pipelines (Twitch API, Gathr, AWS S3)

Software Engineer Intern

May 2022 – Aug 2022

Neighbor Storage, Inc.

- Enabled users to create and update rental listings and payment information by building UI components (HTML, Tailwind CSS, React with TypeScript) and API endpoints (Ruby on Rails, Go)
- Launched UI-Kit Version 2 by building 10 reusable, fully-tested React components (React Testing Library)

Software Engineer Intern

May 2021 – Jul 2021

Pluralsight, Inc.

- Accelerated user data load time by 67% (6s to 2s) by redesigning the table concatenation procedure (SQL)
- Provided new content access to 17,000+ enterprise customers in 180+ countries by integrating 50GB of data into Pluralsight's insights & analytics platform (SQL, C#)
